<proposals>

This is an activity where people can propose ideas  
and solutions.

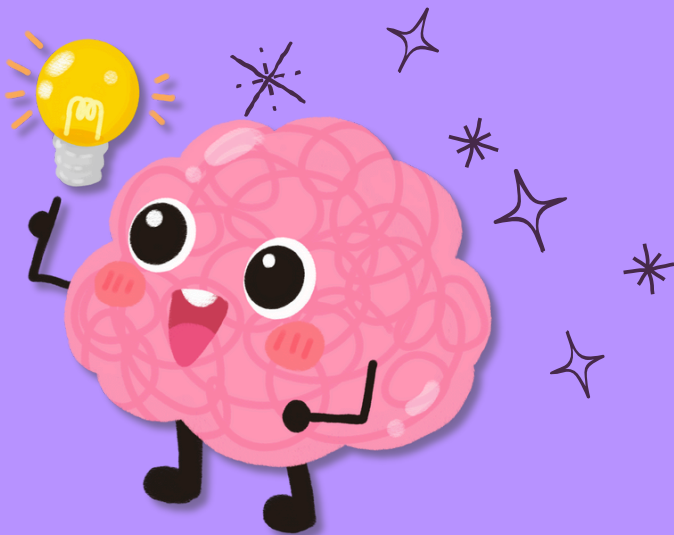

When you use **proposals** in Decidim participants can share their ideas and make real changes in your community. It's like brainstorming ideas—but instead of just talking about it, people can support it, discuss it, and even help make it happen!

**How might you use proposals?**

**What questions could proposals help you answer?**

<meetings>

A **meeting** in Decidim shares the details of a gathering. It can happen in person or online. By using meetings people can find the meeting and join if the details are posted. If someone misses a meeting, you can post the notes for them to catch up.

**How might you use meetings?**

**How might meetings help your participants?**

<survey>

A **survey** in Decidim is a tool that lets you ask people questions and collect their opinions. It's a way to ask your participants questions, helping you understand what people think about a topic, project, or decision. Surveys can have different types of questions—multiple choice, open-ended, or rating scales—to ask different kinds of questions.

**How might you use surveys?**

**What questions might it be important that you ask your community?**

<pages>

A **page** in Decidim is like a digital poster or info sheet. It's a place where you can share important information so that everyone can read and understand what's happening in a project or community. Pages help explain ideas, events, or rules in a clear way.

**How might you use pages?**

<blog>

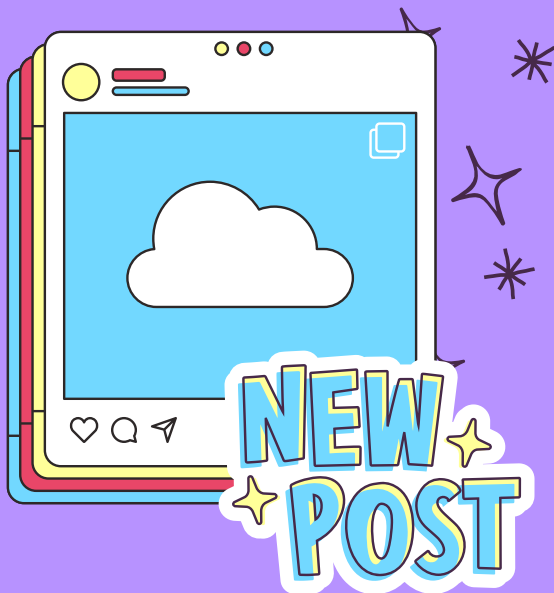

A **blog** in Decidim is like an online journal where you can post updates, stories, and news for your community or project. It helps keep everyone informed about what's happening and sharing news about how your project or community is progressing.

**How might you use a blog?**

**What stories or updates would you share?**

# <accountability>

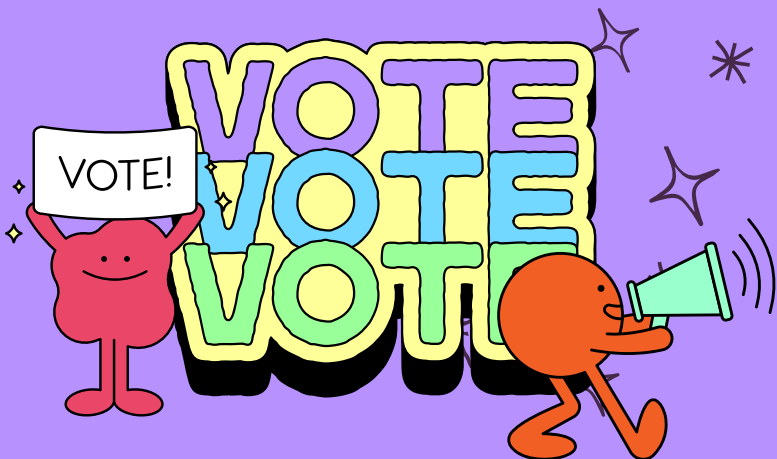

The **accountability** component in Decidim is like a progress tracker. It helps show what's happening with tasks, ideas and projects. People can see if things are going as planned, what steps are completed, and what still needs to be done.

**How might you use accountability?**

**What big tasks would you want to share that you completed or are working on?**

DESIGN YOUR OWN  
PARTICIPATORY PROCESS  
WITH....

<voting>

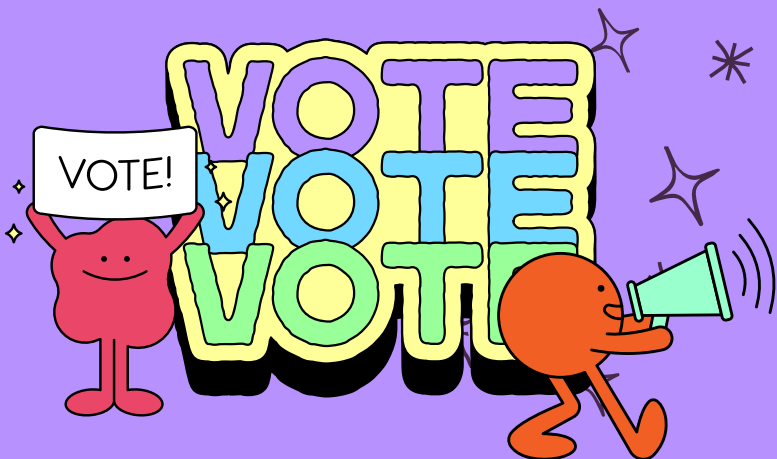

Participants can vote on **proposals** by endorsing  
and supporting them.

**Voting in proposals** is how people help decide which ideas should happen! After proposals are shared, everyone can vote for their favorites. The most voted ones might be used to make ideas into a reality.

**How might you use voting?**

DESIGN YOUR OWN  
PARTICIPATORY PROCESS  
WITH....

<sortition>

Use random selection with **proposals** to create groups of people or choose ideas so that there isn't unfair bias.

**Sortition** is like a lottery, but instead of picking a winner randomly, it's used to choose proposals at random ( for example: a person can be a proposal or ideas can be a proposal). When you do sortition with people it ensures that everyone has an equal chance to be involved.

**How might you use sortition?**

DESIGN YOUR OWN  
PARTICIPATORY PROCESS

# <participatory budget>

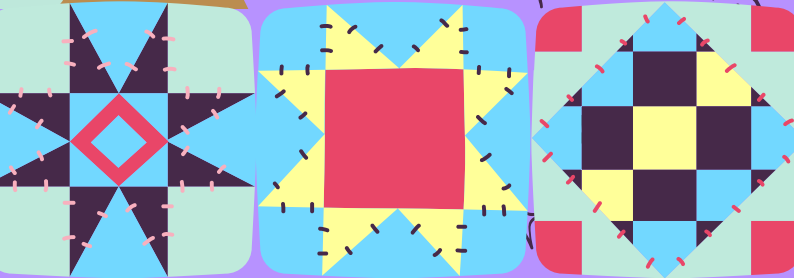

You can publish a budget and allow participants to decide how to spend the funds through voting and submitting **proposals**.

A **participatory budget** is a way for people to help decide how money should be spent on community projects. Instead of just a few people deciding, everyone can pitch in ideas and vote on which projects they think are the most important or fun to fund.

**How might you use a participatory budget?**

DESIGN YOUR OWN  
PARTICIPATORY PROCESS  
WITH....

<participatory  
text>

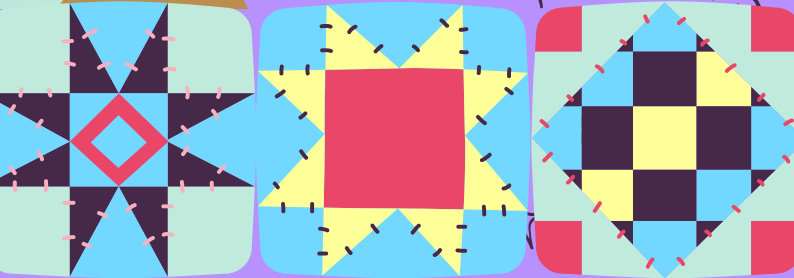

You can create a participatory text through  
submitting **proposals**.

A **participatory text** makes proposals appear as plain text so that people can work together to write something. It's like a big shared document where everyone can add their own text or paragraphs and amend or change them. It helps create a text that reflects everyone's thoughts and is built by the whole community.

**How might you use a participatory text?**

<assemblies>

This is a space for groups that meet regularly and host activities like debates, surveys, proposals etc.

An **assembly** is a group who meets regularly to have different discussions and make decisions. They can host activities like surveys, debates, keep a blog etc.

Assemblies can hold meetings and can be private or open to everyone.

**Why might you make an assembly?**

**Who would it include?**

<processes>

This is a space for groups that have a specific journey or project and want to host activities like debates, surveys, proposals etc.

A **process** is for a group of people who have a specific project or journey with different phases. In each phase they can host activities like debates, surveys, and proposals to make their project happen!

An example of a process would be if you want to create a garden. The first phase might be to design the garden, the second phase would be to plant the herbs, flowers etc., and the third phase would be to organise the care of the garden.

**What might you use the process for?**

**What phases or steps might it include?**

## <conferences>

This is a space to create an event, share the program for your event, and host activities like surveys, debates, etc.

A **conference** is just another way to say event. In conferences, meetings are displayed like an agenda or schedule, with days and hours being listed like in an event program.

A **conference** is a collection of meetings arranged in a program, with a number of people who can be featured as speakers, and other information like the location etc.

**What big or important events might you use the conference space for?**
